PRESS RELEASE

**Agri Innovation Expo 2026 brings research closer to society and the market
24 and 25 September 2026, Museum of Agriculture, Agricultural University of Athens**

Under the central message "**Cultivating a Better World**", the **Agricultural University of Athens** is organising **Agri Innovation Expo 2026** on **24 and 25 September 2026**, a two-day Innovation Exhibition dedicated to research, innovation, entrepreneurship, and technology transfer in the agri-food sector.

The exhibition will take place in the courtyard of the **Museum of Agriculture**, of the **Agricultural University of Athens** and aims to serve as a meeting point for the university community, businesses, primary producers, industry stakeholders, investors, and everyone interested in the future of agri-food and innovation.

Where knowledge becomes action

Agri Innovation Expo 2026 highlights how university research can be transformed into solutions with real impact on production, the economy, and society.

For two days, research teams, laboratories, spin-offs, and innovative initiatives from the Agricultural University of Athens will present technologies, applications, and research results that address contemporary challenges in agriculture, agri-food, sustainable development, and environmental protection.

Visitors will have the opportunity to get a close look at artificial intelligence applications for the primary sector, new precision agriculture technologies, innovative solutions in biotechnology and food technology, modern approaches to crop management, as well as initiatives highlighting the journey of a research idea from the lab to the market.

Dialogue, collaborations, and new prospects!

An important part of the event consists of thematic discussions and networking activities that will bring the research community into contact with businesses, investors, organisations, and institutional stakeholders.

Emphasis will be placed on the potential for leveraging university research, developing collaborations, and strengthening technology transfer, with the goal of creating a stronger innovation ecosystem in the agri-food sector.

Official Opening

The official opening of Agri Innovation Expo 2026 will take place on **Thursday, 24 September**, with the participation of representatives from the state, the academic community, the business sector, and the financial sector, highlighting the importance of collaboration between universities, public bodies, and the market in strengthening innovation.

Do not miss it!

Agri Innovation Expo 2026 is addressed to:

- Researchers and members of the academic community
- Students and young scientists
- Businesses and professionals in the agri-food sector
- Producers and cooperatives
- Investors
- Public administration officials and representatives of institutional bodies
- Every citizen interested in innovation, sustainable development, and the future of Greek agri-food systems

Powered by “InnovinAgri”

The organisation of Agri Innovation Expo 2026 is undertaken by **the Innovation, Entrepreneurship, and Technology Transfer Office (InnovinAgri)** of the **Special Account for Research Funds (SARF) of the Agricultural University of Athens**, which supports the valorisation of university research, the development of collaborations with the market, and the promotion of innovation for the creation of societal and economic impact.

This initiative is carried out within the framework of the **"Romvos" Technology Transfer Collaboration Network**, a new **partnership** between the **Agricultural University of Athens**, **Panteion University**, the **University of Piraeus**, and the **University of Thessaly**, aiming to strengthen technology transfer and the utilisation of research results.
